

ENGLER VISCOMETER BPTL-106

ENGLER VISCOMETER BPTL-106

Viscosity of an oil is defined as its resistance to flow and Viscometer measures the flow. Monitoring viscosity is one of the most important components of any oil analysis program. Minute changes in viscosity at operating temperatures can be magnified to the extent that an oil is no longer able to provide adequate lubrication and efficiency in preventing friction between moving parts.

Used in Petroleum Industry, Oil and Gas Industry.

BPTL-106 ENGLER VISCOMETER

The instrument is composed of tester and temperature controller. Desktop structure. Both of inner and outer crucible adopt stainless materials. Inner crucible has been specially processed. The smooth finish corresponds with the test requirements.

SPECIFICATIONS

Model	BPTL-106
Temperature controlling method	Imported PID digital temperature controller
Temperature controlling accuracy	$\pm 0.1\text{ }^{\circ}\text{C}$
Heating method	Electrical heating tube
Total power	3.5 KW
Working unit	5 tubes
Power supply	AC220 V/ 50 Hz

Biolab Scientific Ltd.
