

BOILING POINT TESTER BPTL-222

BOILING POINT TESTER BPTL-222

Petroleum testing is the analysis during upstream, midstream, and downstream production processes of petroleum products. It is most commonly used to test petroleum product, its product components, byproducts of crude oil, fuel, natural gas, upstream oil and gas and other formats of petroleum.

Used in Petroleum Industry, PVC Pipe Industry.

BPTL-222 BOILING POINT TESTER

Comply with test requirements of antifreeze and brake fluid. Digitally display control voltage. High temperature resistant glass partition

SPECIFICATIONS

Model	BPTL-222
Furnace	IR heating furnace no radiation, fast temperature rising speed
Test requirements	Comply with test requirements of antifreeze and brake fluid
Glass partition	High temperature resistant
Display	Control voltage
