### **BOILING POINT TESTER BPTL-222**

Petroleum testing is the analysis during upstream, midstream, and downstream production processes of petroleum products. It is most commonly used to test petroleum product, its product components, byproducts of crude oil, fuel, natural gas, upstream oil and gas and other formats of petroleum. Used in Petroleum Industry, PVC Pipe Industry.

#### **BPTL-222 BOILING POINT TESTER**

Comply with test requirements of antifreeze and brake fluid. Digitally display control voltage. High temperaeture resistant glass partition

#### SPECIFICATIONS

| Model             | BPTL-222   |
|-------------------|--|
| Furnace           | IR heating furnace no radiation, fast temperature rising speed |
| Test requirements | Comply with test requirements of antifreeze and brake fluid    |
| Glass partition   | High temperature resistant                                     |
| Display           | Control voltage  |
