

GLASS BEAD STERILIZER BSTE-201

GLASS BEAD STERILIZER BSTE-201

Glass bead sterilizer is a sterilizing instrument, which is commonly used in the endodontic dentistry. Glass bead sterilizer works on the principle of intense dry heat. Even though many sterilizing methods are used for sterilization glass bead sterilizer has efficiency to destroy the microorganisms.

Used in Forceps, scissors, scalpels, needles, ring vaccination and inoculation needle and commonly used in labs.

Also known as Steam sterilizer, Laboratory autoclave, Laboratory sterilizer.

BSTE-201 GLASS BEAD STERILIZER

Small volume, light weight, simple operation, long working life

Inner temperature of container is equipped with high temperature sterilization beads can be heated to about 300°C

Randomly configure glass bead with diameter 1.5~2.0mm

Compact appearance design, digital displays temperature at real-time. It can be used in ultraclean workbench

Stainless steel inner container, built-in high-performance heating element, high precision of temperature controller and overtemperature protection

SPECIFICATIONS

| | |
|--------------------------------------|-----------------------------|
| Model | BSTE-201 |
| Heating Speed | ≤25 min |
| Voltage | AC 220 / AC 110 V, 50/60 Hz |
| Power | 300 W |
| Fuse | 250 V, 2A/3A, Φ5x20 |
| Dimension | W.130xD.150xH.200 mm |
| Net Weight | 2.5 kgs |
| Temp. Control Range | 100 °C~300 °C |
| Temp. Stability | ±5 °C |
| Heating Well Volume(diameterx depth) | Φ40X150 mm |
| Glass Beads Capacity | 600 g |
| Cover Material | Stainless steel |
| Insulation Material | Green Mineral Wool |
